EDUCATION

Nandha Enginnering College , Erode	B.E (ECE)	Current CGPA: 9.34	2026-present Erode
Kamaraj Municipal Boys Higher Secondary School, Erode.	HSC(12th)	Percentage 94%	2022-2023 Erode
GHS, VEDIYARASAM PALAYAM.	SSLC(10th)	All Pass	2020-2021 Namakkal

SKILLS SUMMARY

- **Languages**
Java, C (basics)
- **Software Tools**
Arduino IDE , ki-Cad

PROJECTS

Vehicle Theft Detection Using Vibrational Sensor

- Developed a security system to detect unauthorized movement of vehicles.
- Used a vibrational sensor to sense unusual motion or tampering.
- When vibration exceeds a threshold, the system triggers an alarm/alert to notify the owner.

Smart Hairpin Bend Accident Prevention System

- Designed a system to reduce accidents at hairpin bends on hill roads.
- Sensors detect vehicles approaching from both sides of the bend.
- Warning signals (LED/Buzzer) alert drivers to prevent collisions.

Smart Dynamic Queue Management for Toll Plaza

- Proposed a system to monitor and manage vehicle queues at toll plazas.
- Uses sensors and dynamic control to reduce congestion and waiting time.
- Improves traffic flow and fuel efficiency.

CERTIFICATIONS COMPLETED

- Ethical Hacking Course (NPTEL-62%)
- Introduction to IOT Course(NPTEL-76%)
- Cloud Computing Course(NPTEL-76%)
- Honours Diploma in Computer Applications (TCEDS-96%)

ACHIEVEMENTS

- III Prize – Technical Quiz, VIDYAA VIKAS COLLEGE OF ENGINEERING AND TECHNOLOGY, 2026.
- Secured 3rd Prize in an inter-college Technical Quiz competition, demonstrating strong technical knowledge and problem-solving skills.

INTERNSHIP EXPERIENCE

Embedded Programming on Arduino AVR – Beginner in Embuzz Technologies | 16 June 2025 – 30 June 2025

Worked on Embedded Systems and Microcontrollers using Arduino UNO, performed sensor interfacing with LEDs and buzzers, developed and tested mini embedded projects, and gained hands-on experience in hardware interfacing, circuit design, and embedded programming.

Embedded Systems & IoT Internship in Caliber Embedded Technologies | 23 December 2025 – 05 January 2026

Worked on IoT-enabled sensor monitoring systems., integrated Bluetooth HC-05 modules and multiple sensors, and tested and analyzed real-time hardware data for embedded applications.
